

## **HOPE STUDY TOUR**

*FOR HOSPITAL AND HEALTHCARE DIRECTORS AND MANAGERS*

### **LEAN MANAGEMENT IN HOSPITALS** *The example of the Hospices civils de Lyon*

**From 2 to 3 February 2017**  
**Lyon (France)**

The *Hospices Civils de Lyon* and the French Hospital Federation organise on 2 and 3 February 2017 a HOPE study tour on Lean Management.

Created by Toyota in the 1970s, Lean Management is a method of organizing work that intends to improve production with fewer resources. To this end, Lean Management relies on the active participation of all stakeholders to optimize the overall performance of organizations and reduce waste.

While many French companies have already adopted lean management, what about the first experiments conducted in the French public hospitals?

This HOPE study tour is an opportunity for European professionals to discover a successful experience of Lean development in public hospitals on site.

Hospices civils de Lyon, the second largest university hospital in France, integrate all disciplines, and bring together 14 multidisciplinary or specialized establishments. They employ more than 22,000 professionals with the most advanced equipment.

In addition to meeting a number of management and field staff, this study tour will make it possible to understanding the contribution of Lean Management in hospitals and to cover the issues raised by its implementation in one of Europe largest university hospital group.

**Fee : 350 euros/Person**
