Paoli-Calmettes Institute (IPC)

Based in Marseilles, Paoli-Calmettes Institute is the first cancer comprehensive centre in region providing global care for cancer. It is a member of the national federation UNICANCER. The Institute has been licensed by the HAS (the overall French health authority) at the highest level in 2015. The centre gathers 1 550 employees - researchers, medical doctors, health and administrative staff - engaged in wide range of activities on site: prevention, research, treatment and training. IPC registered over 100 000 consultations and over 10 200 new patients in 2017.

In addition, over 250 researchers work in close collaboration with the medical teams to offer the cutting edge scientific advancements and the highest level treatments against cancers.
