

Quality & Safety network

11 June 2019 – Pascal Garel – Chief Executive – HOPE

In collaboration with PAQS

Quality & Safety network?

Sharing is caring

Sharing best practices and experience

Most effective ways to improve :

- our health systems
- and more particularly Quality of care and Patient safety issues

Opportunity

Considering the absence of current practical actions by the European Union institutions

Opportunity to develop a structured network to share Quality and Safety best practices between European countries

Objectives

Available ressources

members of HOPE with their respective networks with own expertise and resources

expertise and resources PAQS holds

Mutual goals

- Create/reinforce links between different organisations working on Quality of care and Patient Safety in Europe;
- Strengthen the image and visibility of these organisations, of HOPE and PAQS;
- Increase learning opportunities and share best practices;
- In the long term, facilitate the **implementation of common projects** in different European countries.

Practical aspects

Webinars

Gather on a quarterly basis by means of educational webinars

Content?

- First the webinars would be limited to the presentation of carried out actions and projects by the members
- Gradually the objective of the webinars would be to present more in detail a best practice and/or an innovation
 - Facilitate its adoption by others

NEWSLETTER APRIL 2019

PAQS PROMOTES LEADING PRACTICES

involvement which, unfortunately, is not healthcare professionals in Belgium. always feasible given constraints health organizations face. Therefore, we decided At PAQS, we are very proud of this cooperation with change throughout the sector.

In late 2018, we concluded a cooperation organization that has demonstrated a ositive change, is people centred, safe and

Specifically, PAQS will be in charge of collecting practices likely to be recognized as Leading Practices through specific calls. These practices will then be reviewed by a panel of Belgian experts using a rigorous evaluation process developed by HSO and applied uniformly in all

Since the launch of PAQS in 2014, our main A summary of each approved Leading Practices approach has been to share and learn from will be published on the PAQS website while the full each other to support continuous story will be stored in the Leading Practices mprovement in health care organizations. Iibrary on HSO's website which already contains However, we do realize that taking part in our activities can be time consuming. And should facilitate the dissemination and the that it also requests a high level of appropriation of these innovative practices among

to develop a project allowing us to HSO, with whom we have been working for several disseminate innovative practices that could years now. This project gives us the opportunity to inspire health professionals and stimulate highlight the quality of our healthcare system, but also, and above all, to promote a global learning dynamic among Belgian health professionals. agreement with Health Standards Several other projects are currently being finalized Organization (HSO) to promote Leading with HSO. By joining the growing number of Practices in Brussels and Wallonia. HSO initiatives working together at the international level, defines Leading Practices as "a practice we aim to positively, significantly and durably carried out by a health and/or social service improve the quality of health services for all.

Formulaire déclaration d'Évènements Indésirables associés aux Soins

Informations concernant l'évènement

Pour comprendre et prévenir les évènements indésirables associés aux soins (EIAS), il faut avant tout, les partager et les analyser.

C'est pour cette raison que la PAQS a créé ce formulaire de déclaration d'EIAS destiné aux professionnels de santé. L'objectif est de partager autant que possible les expériences mais aussi de dégager des recommandations pour éviter la survenue des EIAS.

La PAQS garantit l'**anonymat** et la **confidentialité** dans le traitement des toutes les données enregistrées.

Merci pour votre partage!

optimisé par 🗥 SurveyMonkey

*La définition d'un évènement indésirable utilisée par la PAQS est celle développée par le SPF Santé publique.

Objectives

What is TeamSTEPPS?

Belgian roll-out of a TeamSTEPPS pilot project

First results of TeamSTEPPS in Belgium

TeamSTEPPS

Why TeamSTEPPS?

Teamwork system designed for professionals

Developed by Department of Defense's Patient Safety Program in collaboration with the Agency for Healthcare Research and Quality

- A powerful solution to improving performance and patient safety
- An evidence-based teamwork system to improve
 - Communication
 - Teamwork and behavioural skills
 - Attitudes
 - Knowledge
- Scientifically rooted in more than 30 years of research and lessons
 - Salas, et al. (2008) meta-analysis provided evidence that team training had a moderate, positive effect on team outcomes $(\rho = .38)$

- Free ready-to-use materials
- Integration of teamwork principles
- A training curriculum

TeamSTEPPS essentials	TeamSTEPPS fundamentals	TeamSTEPPS trainer/coach course
2 hours	1 day	1 day
Overview of all modules	7 modules	5 modules
Non-clinical staff	Direct patient caregivers	Master trainers and coaches
	TeamSTEPPS master training	

Higher quality, safer patient care: how?

 Producing highly effective medical teams that optimise the use of information, people, and resources to achieve the best clinical

outcomes for patients

- Increasing team awareness
- Clarifying team roles and responsibilities
- Resolving conflicts
- Improving information sharing
- Eliminating barriers to quality and safety

What Makes Up Team Performance?

- Knowledge Cognitions "Think"
 - Shared Mental Model
- Attitudes Affect "Feel"
 - Mutual Trust
 - Team Orientation
- Skills Behaviours "Do"
- Performance
 - Adaptability
 - Accuracy
 - Productivity
 - Efficiency
 - Safety

Performant, efficient, safe, mutual understanding,...

What can you expect?

BARRIERS

- Inconsistency in Team
 Membership
- Lack of time
- Lack of information sharing
- Hierarchy
- Defensiveness
- Conventional thinking
- Complacency
- Varying communication styles
- Conflict
- Lack of coordination and follow-up with co-workers
- Distractions
- Fatigue
- Workload
- Misinterpretation of cues
- Lack of role clarity

TOOLS and STRATEGIES

Communication

- SBAR
- Call-our
- Check-back
- Handoff

Leading teams

- Briefing
- Huddle
- Debrief

Situation monitoring

- STEP
- I'M SAFE

Mutual support

- Task assistance
- Feedback
- Assertive statement
- Two challenge rule
- CUS
- DESC script

OUTCOMES

- Shared mental model
- Adaptability
- Team orientation
- Mutual trust
- Team performance
- Patient safety

TeamSTEPPS has a three-phased process aimed at creating and sustaining a culture of safety with:

> A pretraining assessment for site readiness

Training for onsite trainers and health care staff

Implementation and sustainment

START

Objectives, action plan, onsite training, implementation phase

2018-2019

COLLABORATIVE FOLLOW-UP

Participating institutions meeting every 4-5 months

Collaborative approach

Inspired from the Breakthrough Series Collaborative of the Institute for Healthcare Improvement

Implementation phases

One year and a half later

Any results?

One year and a half later... Support and learning sessions

3 follow-up meetings

Learning sessions

- Share obstacles and problems encountered
- Open and transparent discussions
- Share ideas and experiences

MyPAQS

Online working, learning and sharing space

- Forum
- Share documents
 - Guides/recommendations
 - Videos
 - PPT templates
 - Advice
 - PAQS presentations
 - Participating institutions' presentations

One year and a half later... Support and learning sessions

"Maintain these learning sessions because they're motivating and boosting. The discussions are interesting and supporting."

"Really enlightening and instructive" sessions with the other institutions!".

One year and a half later... Quantitative results?

155 staff 70 doctors 9 units/wards 3 master trainers

337 staff 49 doctors 12 coaches 4 master trainers hospital wide project

100 % staff 11 coaches (8 doc./3 nurses) 1 emergency department 3 master trainers

hospital wide project on-site training scheduled 8 master trainers

One year and a half later... Identified recommendations

One year and a half later... Tools and resources developed by the institutions

Video capsules for each tool with **psychiatric** scenarios in production

Educational leaflets

e-learning

Notebooks

What brings the end of 2019?

One last learning session scheduled in November 2019

Publish recommendations report

Final evaluation for the participating hospitals: patient safety culture

- Follow-up via MyPAQS
- Annual learning session (TeamSTEPPS community?)
- TeamSTEPPS 2.0 ?

Say yes to TeamSTEPPS

Full package of resources and implementation strategies

Motivated change team and master trainers

Impact on teamwork performance
Impact on culture of patient safety
Impact on patient safety

Long-term project

Organisation of learning sessions according to the ongoing projects

Motivate institutions to measure

To conclude in a nutshell

Thank you for your attention
